Absolute Plumbing

Your Top Shelf Growth Plan · Plumbing & drain services

This is the companion to your audit — a plain-English look at the problems we actually found for Absolute Plumbing, what they're quietly costing you, and exactly how Top Shelf would fix each one. No jargon, no pressure — just a clear path forward.

You've earned what most local plumbers only wish for — a 4.8 rating across 228 reviews, the kind of trust that closes jobs before you ever pick up the phone. The issue isn't your reputation; it's that a few fixable cracks are quietly letting that trust leak away before it reaches the customers searching right now. Here's what your audit found, what it's costing you, and how we'd fix each one.

01 What your audit turned up

Three real gaps from your audit — each grounded in what we actually saw on your site and profile.

1 Your website's phone number doesn't match Google

COSTING YOU This is the single most damaging issue we found. When your site and your Google profile show different numbers, Google trusts your listing less (which drags your local ranking), and a ready customer can land on an old or wrong number. You lose the job at the exact moment they wanted to hire you.

OUR FIX We unify your name, address, and phone to one correct number everywhere — website, Google profile, and every directory — and add a tap-to-call button on every page.

THE RESULT Every search and every click routes to one number that rings you, and Google starts trusting your listing again.

2 None of your 228 reviews are on the site

COSTING YOU Your reputation is stuck on Google. A visitor on your website — the page where they decide whether to call — never sees the 228 reasons to trust you, so a strong first impression goes to waste.

OUR FIX We add a live reviews wall to your homepage and service pages so your best asset does the persuading right where the decision happens.

THE RESULT Your 4.8 and 228 reviews close the visitor on the page, lifting calls immediately.

3 There are almost no real service or city pages

COSTING YOU With no in-depth pages for water heaters, drain cleaning, slab leaks, or for the towns you serve, you're invisible for "water heater repair Flower Mound" and similar searches — and thinner competitors outrank you on volume alone.

OUR FIX We build dedicated service pages and city pages (Flower Mound, Highland Village, Lewisville, Lantana) with the local schema Google needs to rank them.

THE RESULT You show up for the exact jobs you want, and your reputation finally has pages worth ranking.

Does this sound familiar?

Those are the things we could spot from the outside. But you're the one running the trucks and the phones every day — so a few of these probably hit closer to home.

O2 Other things we hear from owners like you

Common headaches for a busy plumbing business — and what it looks like once they're off your plate.

You miss calls while you're under a sink

THE DRAG A homeowner with a leak won't leave a voicemail and wait — they call the next plumber on the list, and that job is gone.

OUR FIX An automatic text back the instant a call is missed, plus online booking so leads can lock in a slot themselves.

THE RESULT Every missed call gets an instant reply, and the leads you used to lose start turning into booked jobs.

Estimates go out and then go quiet

THE DRAG A quote you spent time on gets no follow-up, the homeowner forgets or hires whoever called back, and the work quietly slips away.

OUR FIX An automatic follow-up sequence on every open estimate — a friendly nudge by text and email on your behalf.

THE RESULT Estimates get followed up every time, and more of them turn into scheduled work without you lifting a finger.

Getting paid means chasing invoices

THE DRAG Waiting on checks and making awkward reminder calls ties up your cash and your time after the job's already done.

OUR FIX Send invoices the customer can pay by card from their phone, with automatic reminders until they do.

THE RESULT Customers pay in a couple taps, cash lands faster, and the chasing stops.

This is just the tip of the iceberg.

What you've seen here is only your website and Google presence — one slice of your business. The bigger wins are in the parts we can't see from the outside. Let's grab 20 minutes and sit down together to map the rest of the day-to-day headaches Top Shelf can take off your plate. Your audit is yours to keep, and you own everything we build.
